

# CORA BIKE RACK

## PRODUCT OVERVIEW SHEET

# PRODUCT MATERIALS

- Cora Bike Rack offers a range of materials and finishes to suit all projects and budgets
- Availability of finishes for each product range can be seen on our 'Product Finishes' sheet

### CORA METALLIC FINISHES

CBR2

#### 304 STAINLESS STEEL

Galvanised Steel provides an economical and robust finish. Cora's hot dipped galvanised (HDG) coating is applied post fabrication. We then hand polish the surface to ensure a smooth and safe surface. A galvanised surface will weather to a battleship grey colour.

SG-1

#### 304 STAINLESS STEEL

Stainless Steel is a very durable and attractive material that will last for decades in tough environmental conditions. Cora's 304 Stainless is brushed to a #4 finish for a rich, attractive appearance.

CBR1

#### 316 STAINLESS STEEL

316 Stainless Steel is the only choice for harsh environmental conditions including salty ocean air. Cora adds an electro polish finish to ensure these racks will outlast all others and maintain an attractive mirror like appearance.

### CORA COLOUR FINISHES

#### STANDARD POWDER COAT

For a smooth finish and to add identity to your project, colour powder coat is ideal for creating attractive indoor bike rooms. Cora recommends it's Standard colour powder coat range for indoor use only.

#### CERAMIC POWDER COAT

Ceramic powder coat is a specialised coating that provides a smooth, high impact and corrosion resistant finish. Cora use an e-coating or pre galvanised base before adding the Ceramic powder coat for additional protection. This is the standard finish on our larger items such as double tier racks, HD bike lockers and vertical posts. Also recommended where an outdoor colour finish is required.
